EDUCATION

York University, Lassonde School of Engineering Sept. 2023 – April 2027
Bachelor of Science in Computer Science Toronto, ON

EXPERIENCE

RBC May 2025 – Dec. 2026
Returned for three consecutive terms Toronto, ON

Technical Systems Analyst Co-op Sept. 2026 – Dec. 2026

- Building an **SRE orchestrator agent** that triages and routes tickets and incidents for the SRE team
- Designing the agent to coach new and existing SREs through faster, more efficient resolution workflows
- Automating repository migrations between platforms with **Ansible**-driven deployments

GenAI & ML Student (Contract, Part-Time) Jan. 2026 – May 2026

- Architected and deployed **LIDA**, a multi-agent AI platform with **150+ onboarded users**, where a supervisor agent routes natural-language questions to 3 specialized ElasticSearch-backed agents (LeanIX, Incident, Change)
- Implemented **BM25 ranking** for a Confluence agent, improving ranked-page accuracy by ~**70%** and cutting response time by ~**40%**
- Delivered a zero-touch **credential rotation** pipeline (Ansible, HashiCorp Vault, Atlassian APIs) in 2 weeks, documented to scale across teams

Technical Systems Analyst Co-op May 2025 – Dec. 2025

- Built GenAI tools for natural-language queries across enterprise systems on **FastAPI** and **GraphQL** services
- Deployed containerized **OpenShift** services with LLM data retrieval, Vault secrets, and a WebEx query bot
- Hardened CI/CD pipelines to pass enterprise security scans and improve deployment reliability

Freelance Full-Stack Developer July 2025 – Present
Independent client engagement Remote

- Built and maintain a production React + **FastAPI** support dashboard on HubSpot's CRM API, live 14+ months
- Implemented **OAuth2** with proactive token refresh across **15 REST endpoints**, plus per-user data scoping
- Shipped ticket triage, server-side KPIs (resolution rate, time-to-close trend), security audits, and prod fixes

PROJECTS

ARK | *Shared-day accountability PWA* Next.js, TypeScript, Supabase, PostgreSQL

- Built a two-user PWA where shared tasks need mutual confirmation, enforced by **Postgres RLS** on 12 tables
- Kept scheduling logic in pure TypeScript with **119 unit tests**, run against an in-memory store via an I/O port
- Added proof-of-work photo capture on Supabase Storage via 7 versioned SQL migrations; deployed on Vercel

TEF Canada Exam Simulator Node.js, Express, JavaScript

- Built a timed TEF Canada reading-exam simulator with **240 questions**, 6 mock exams, and NCLC scoring
- Parsed exam PDFs into structured JSON with a pdf-parse + regex pipeline and a raw-text verification dump
- Added client-side retry-with-backoff so the app stays usable through Render free-tier cold starts

SKILLS

Languages : Python, TypeScript, JavaScript, SQL, Java, C
AI & ML : GenAI / LLMs, Multi-Agent Systems, Prompt Engineering, RAG (LangChain), OpenAI API, Claude API, MCP
Frontend : React, Next.js, Tailwind CSS, Vite, PWAs
Backend & Data : FastAPI, Node.js/Express, GraphQL, REST, OAuth2, PostgreSQL, Supabase, ElasticSearch, MongoDB
DevOps & Cloud : Docker, OpenShift (OCP4), Ansible, HashiCorp Vault, CI/CD, AWS Lightsail, Vercel
